We are a team of

Arrhythmia  
Prediction

In this project, we build an effective electrocardiogram (ECG) arrhythmia classification method

using a convolutional

neural network (CNN), in which we classify ECG into seven categories, one being normal and the other

six being different

types of arrhythmia using deep two-dimensional CNN with grayscale ECG images. We are creating a web

application where

the user selects the image which is to be classified. The image is fed into the model that is

trained and the cited

class will be displayed on the webpage.

## PREDICT\_BASE PAGE (SCREEN SHOT):

The screenshot shows a web browser window with the URL `127.0.0.1:5000/upload`. The page features the **LifeCare** logo in the top left and navigation links for **Home**, **Info**, **About Us**, **Contact Us**, and **Predict** in the top right. The main heading is **ECG Arrhythmia Classification**. Below this, there is a green **Choose...** button and a placeholder image of an ECG waveform. The prediction result is displayed as **Result: Right Bundle Branch Block**. The browser's taskbar at the bottom shows the system time as 08:49 on 12-11-2022.
